HELP JASON FIND STRONGER BONES!

COLOR BY NUMBER WITH EMMA

Word Match Answer Key

- Earth - the planet we live on
- Jupiter - the biggest planet in our solar system
- Mars - the Red Planet
- Mercury - the planet in our solar system that's closest to the sun
- Neptune - the planet in our solar system that's furthest from the sun
- Planet - large object that circles around the sun or any other star
- Pluto - a dwarf planet that used to be considered the planet furthest from our sun
- Saturn - planet surrounded by a system of rings
- Uranus - planet that rolls rather than spins
- Venus - planet that is similar in size to Earth
- Galaxy - large group of stars held together by gravity
- Milky Way - the galaxy we live in
- Sun - the star in the middle of our solar system
- Comet - a rock that's icy and lets off dust and gas as it flies through space
